26 September 1969

MEMORANDUM FOR: Office of Special Activities/DDS&T

SUBJECT: Comment on OSA Draft Memorandum  
for 303 Committee

Subject draft memorandum states the situation well. We recommend, however, changing the first sentence of your draft paragraph 3 to read as follows:

"3. I believe, however, that the U-2 can be effectively employed for coverage of targets and areas in South China where weather adversely affects satellite collection and where the satisfaction of existing intelligence requirements is significantly deficient."

Chairman

Committee on Imagery Requirements and Exploitation
